

Administrative Linkages: So what?

Presented by:

Roger Pizarro Milian

Assistant Director, Student Data + Advanced Analytics, University of Toronto

November 7th, 2025

Brief History: The “Dark” Ages (early 2010s)

Access/Pathways

- Toronto District School Board (TDSB) (e.g., Anisef, Brown, & Robson, 2013)
- OUAC (e.g., Dooley, Payne, & Robb, 2012)

School-to-Work Transitions

- National Graduates Survey (NGS) (e.g., Frenette, 2004; Walters, 2004)

Life Course

- Youth in Transitions Survey (YITS) (e.g., Hango & de Broucker, 2007; Milla, 2012)

Finnie, Mueller, Sweetman – Debunking the Barista Fallacy: A New Way of Measuring Earnings of University Graduates

It's time to retire the myth of the educated barista

Higher education does lead to higher incomes: University of Ottawa study

Those with the biggest paycheques should come as no surprise: engineers, nurses and computer whizzes start at \$50,000 to \$60,000 a year straight out of university, and engineers can hit \$99,000 within eight years

New study debunks myth that arts graduates end up in low-paying jobs

The ELMLP Era (~2018 – present)

- **Not** a dataset, but a linkage environment.
- Growing number of **administrative + survey datasets** which can be “joined”.
 - Enrolment files (PSIS)
 - Tax records (T1FF)
 - Census 2016/2021
 - Ontario High School (EDU)
- Plethora of advantages:
 - Census-level coverage, facilitating analysis of structurally small groups.
 - No survey-related attrition, simplifies analysis.
 - Cost efficient, generated through regular operations.
